Connected COW-Chitale Dairy

Chitale Dairy takes cows to cloud, IoT

- Using RFID tags, and cellphones to track the health and nutrition of cattle has markedly raised the animals' productivity

- <http://www.livemint.com/Oj8jCvMWL/Chitale-Dairy-takes-cows-to-cloud-IoT.html>

ShopWorx- IOT for Manufacturing

- Monitor performance of all plants from any location from your tablet, laptop or Smartphone.
- Look at key metrics in real time. Be up to date on the go!
- Plant Performance
- TV Dashboards allow control room setup for monitoring plant performance
- Realtime Machine and Production status
- Take immediate actions on real time production feedback

<http://www.entrib.com/>

Cooley

- Cooley's end-to-end health-monitoring IoT platform allows the users to collect, store, analyze and share their medical summary with the doctor, while providing insights and personalized health tips to patients based on their medical profile
- <http://cooley.co.in/>

EcoAxis

Remote monitoring and analytics of industrial plants and equipment. Helps to increase operational and service productivity, prompt responses, greater energy efficiency, and enhanced customer satisfaction and retention..

Appleton Innovations, Visakhapatnam

Maven Systems

Smart metering, Smart lighting, Telematics, Remote monitoring of mining and construction equipment, diesel generator sets, solar panels and so on.

<http://www.mavensystems.com/>

Appleton Innovations, Visakhapatnam

NEXIoT

Provide design consulting for IoT/M2M applications in the areas of Smart Water, Energy & Resources management, Industrial Automation, Security, Supply chain & Beacon based applications.

<https://www.nexiot.com/>

SenseGiz

- SenseGiz makes IOT based consumer & enterprise products for smart home/office, security, and smart city applications using a combination of connected hardware, cloud analytics & apps.
- <https://sensegiz.com/>

Yuktrix

- IoT startup creating environment monitoring solutions for emerging markets.
- <http://www.yuktix.com/>

Leaf Wearables

Leaf Wearables is a technology company that puts technology into your daily wearables.

keeps your loved ones safe

Press SAFER twice to send emergency alerts to guardians

<https://www.leafwearables.com/>

Raksha

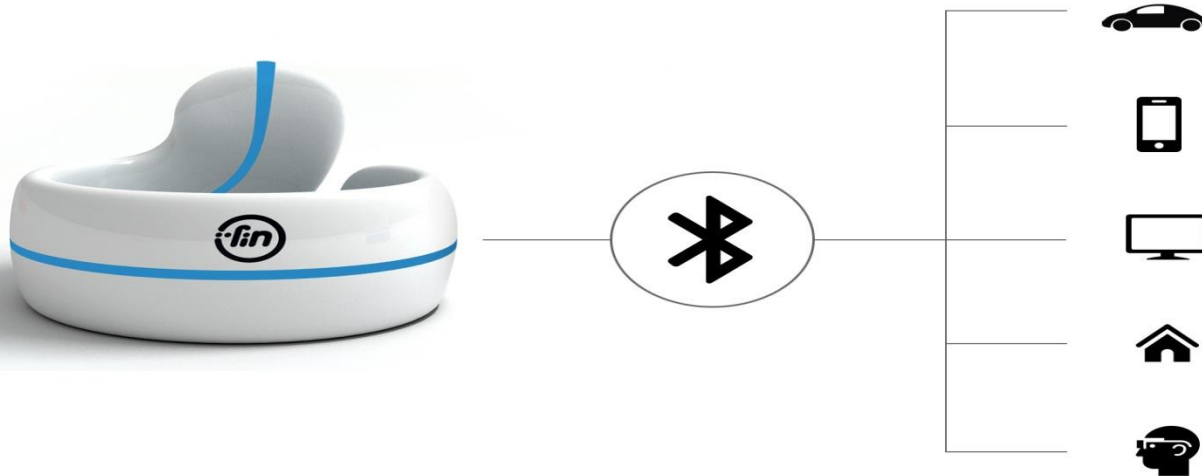

- Raksha: IOT based Road safety device
- **SAFEDRIVE IS YOUR SAFETY NET ON THE ROAD**
- Crash detection, Panic button, Instant notification

Fin (Neyya)

Fin – A Ring That Turns Your Hand Into An Interface

<http://finrobotics.com/>

Pluggx

**Pluggx Labs can automate a room in your house
in under INR 6k**

<http://www.pluggxlabs.in/>

Driveline

- Driveline is the Smart City Infrastructure. Connecting various fragmented pieces together with Technology Infrastructure to create a Greater Experience city.
- <http://teamdriveline.com/>

Metagan

- *simple, secure & standard automation solutions to the world*
- <https://www.metagan.com/>

Ridelogic

CRASH ALERT

If you're ever in a serious crash, ridelogic detects and sends an alert to your loved ones.

RIDE ANALYSIS

Receive feedbacks on your riding pattern for bringing a smooth and efficient riding.

TIRE PRESSURE

Get alerts to fill air when low tire pressure is detected to maintain fuel efficiency and avoid further damage.

Vehicle Diagnostics

Get predictive warnings of impending engine trouble that helps you to take care of problems early.

<http://www.ridelogic.co/>

Cocoon

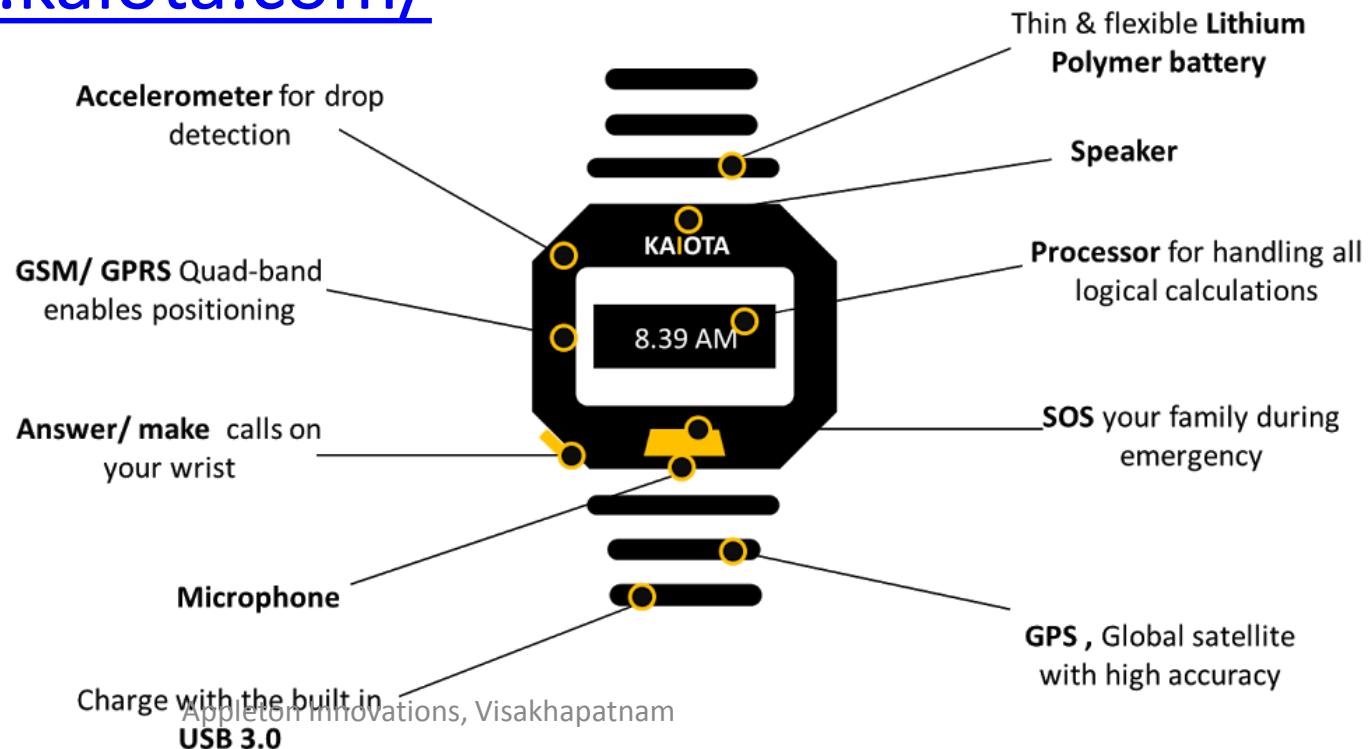

- The only all-in-one home security system that protects your whole home.
- Controlled from your phone, Cocoon sends HD video and audio if an alert is detected.
- <https://cocoon.life/>

KAIOTA

- Kaiota- wearable safety device

<http://www.kaiota.com/>

Traxroot

Traxroot is a no coding M2M IoT Platform which enables manufacturers and service providers to bring connected products to the market quickly and securely. Stream big data and dream niche reports.

<http://www.traxroot.com/>

Lifeplot

The Lifeplot Connected Care Device suite is a framework designed for use by the medical fraternity with the single aim of **"Putting the right information in the right hands, at the right times enabling for informed diagnosis, and for saving lives"**
